Summary

Computer Science undergraduate with hands-on experience in machine learning and full-stack web development. Built AI-powered and containerized applications using Python, React, and modern deployment tools. Interested in applying technical skills to real-world software development problems.

Technical Skills

Languages: Python, C++, JavaScript, SQL

Web & Backend: React, Node.js, Express.js, Flask, REST APIs

Machine Learning: TensorFlow, scikit-learn, NumPy, Pandas, LLMs

DevOps & Tools: Docker, Kubernetes, Git, GitHub, Google Cloud Platform

Projects

Gemini Landmark Description App

Jun 2025 – Jul 2025

Python, Gemini Pro Vision, Streamlit

- Developed AI-powered web app generating landmark descriptions using Google's Gemini Pro Vision
- Designed prompt engineering templates for scenario-based outputs and multilingual translation support

DevOps Project – Containerized Web Application

Apr 2025 – Jun 2025

React, Docker, Kubernetes

- Built and containerized React application using Docker with Kubernetes orchestration
- Applied DevOps principles including infrastructure as code and CI/CD pipelines

DMA – Digital Medical Assistant

Jan 2025 – May 2025

React, Node.js, Python, Machine Learning

- Collaborated in 5-member team to develop web-based medical assistant for disease prediction and patient data management
- Integrated ML models for liver disease, diabetes, heart disease, pneumonia, and breast cancer prediction

Experience

IEEE Student Chapter Member & Conference Volunteer

Jan 2024 – Present

VIT Bhopal University

Bhopal, India

- Coordinated logistics for IEEE CSNT-25 International Conference, managing 100+ participants
- Facilitated communication between international speakers and attendees

Education

Narayana Educational Institutes

India

Class X: 10.0/10.0 GPA — Class XII: 91.9%

2021 – 2023

VIT Bhopal University

Bhopal, India

Bachelor of Technology in Computer Science Engineering; CGPA: 8.8/10.0

Sept 2023 – May 2027

Certifications

- Machine Learning Specialization – DeepLearning.AI & Stanford (Coursera)
- The Web Developer Bootcamp 2025 – Udemy (74 hours)
- Introduction to Machine Learning – NPTEL, IIT Madras (75%)
- DevOps, Agile & Design Thinking – IBM
